THE PROGRAM SCHOOL  
OF NICOLAUS COPERNICUS  
**GMK**  
BÍLOVEC  
**GYMNÁZIUM**  
MIKULÁŠE KOPERNÍKA  
**BÍLOVEC**

• a headmaster: Vít Schindler

• a number of students: 416 (2015)

• types of study: 8-year

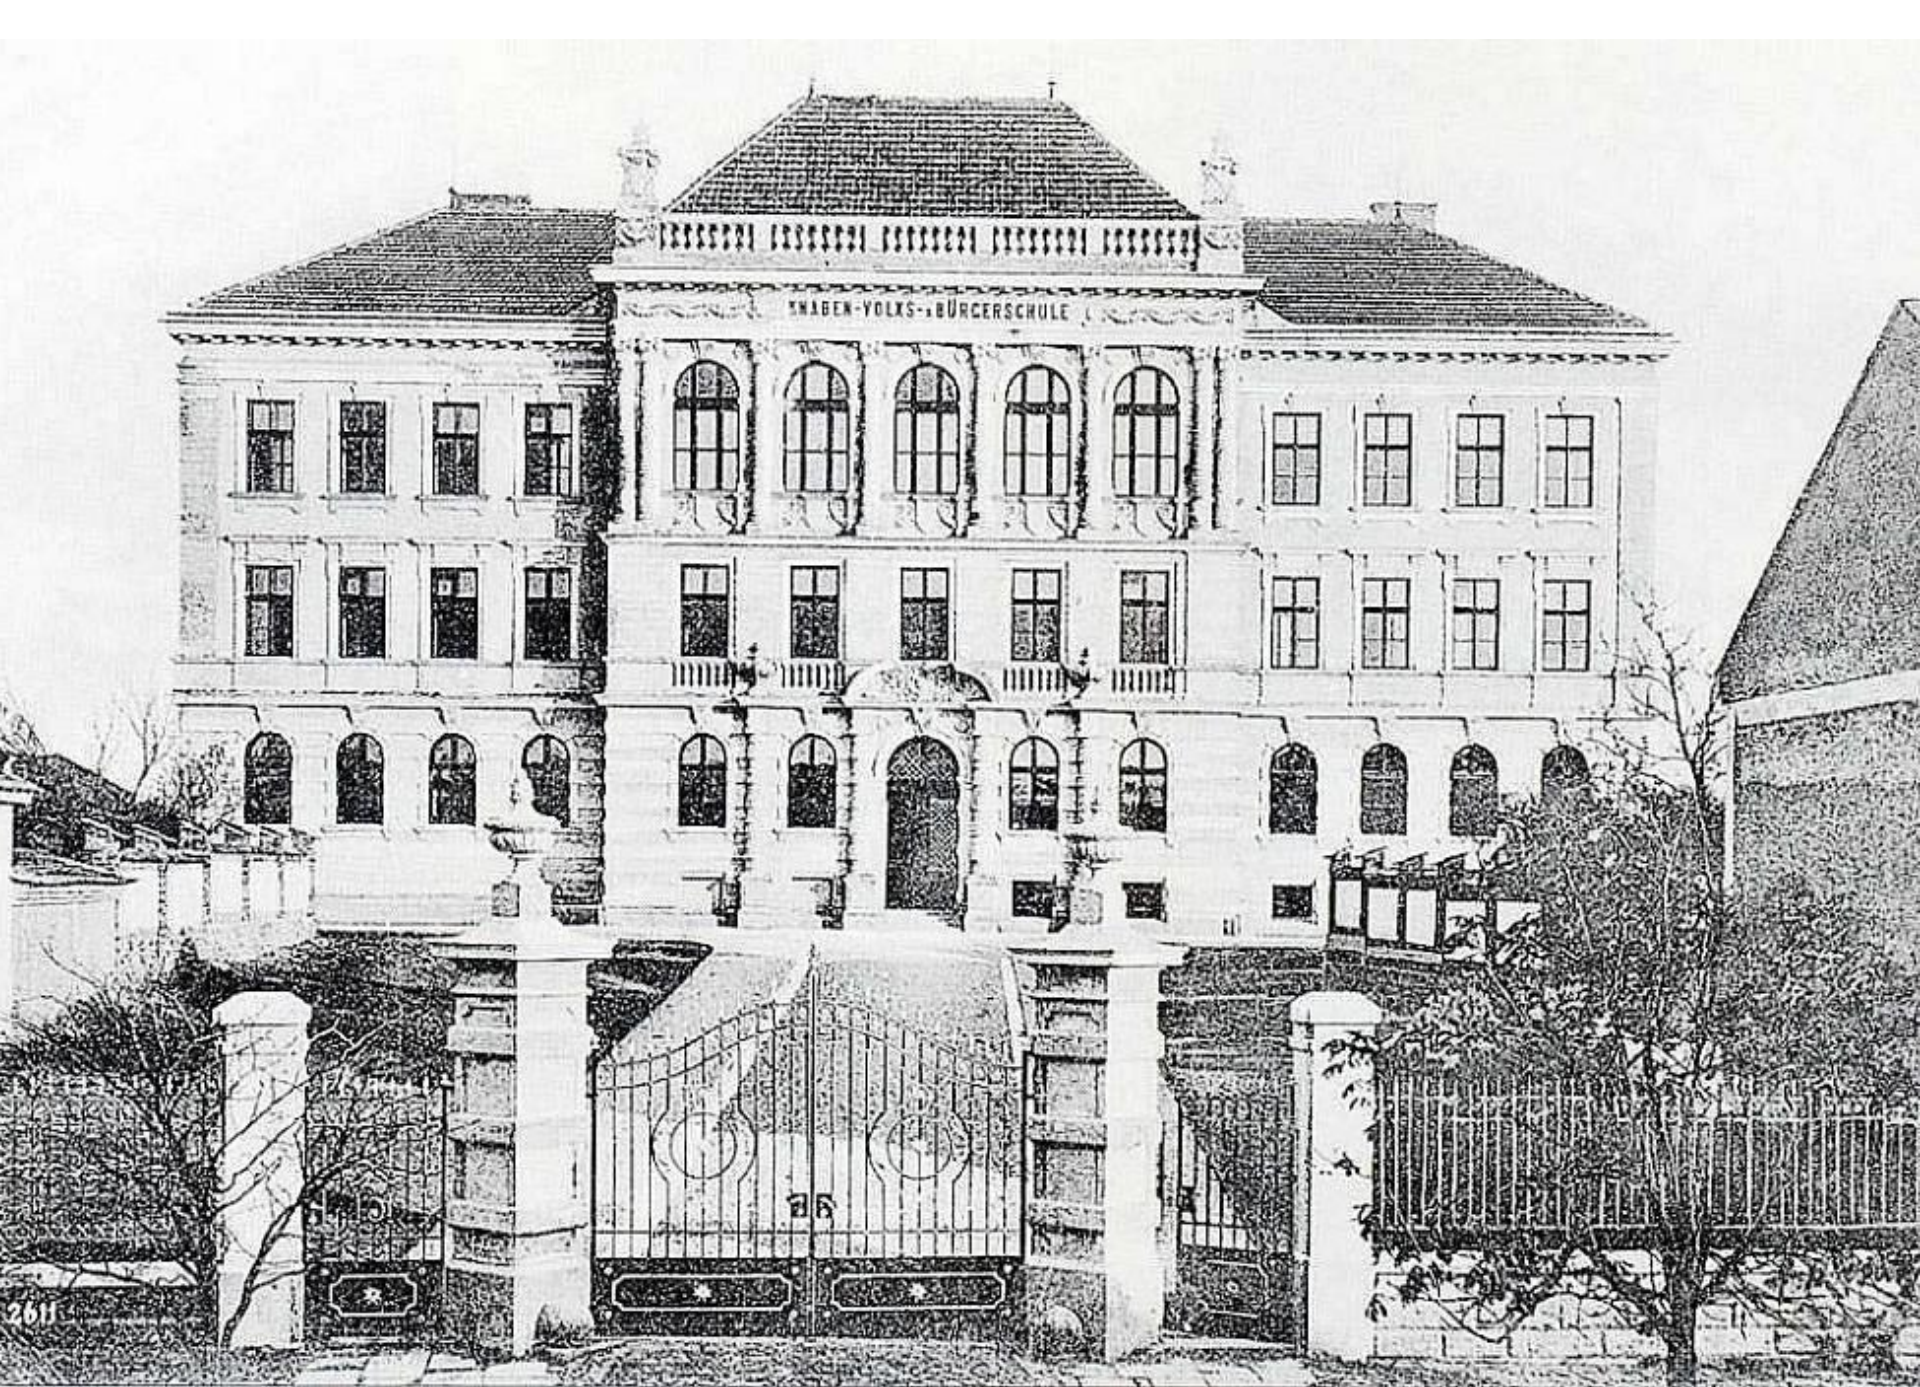

4-year

four-year focused on Maths

# History

In 1902 the building was built as the German elementary and secondary boys' school. During The World War II it was damaged and after the war czech citizens wanted a czech school. So in 1946 the Bílovec Grammar School was founded and in 1974 it became a school for talented mathematicians. Four years later it got its current name (The Grammar School of Nicolaus Copernicus).

KNABEN-VOLKS- u. BÜRGERSCHULE

KNABEN-VOLKS- u. BÜRGERSCHULE

# Equipment

The school has 6 laboratories, 3 computer labs, sports hall, a gym for gymnastics, climbing wall, fitness room and a sportsground outside. It includes also a library and a dormitory.

(club-room of the dormitory)

Our school organises many trips, tours, language courses and exchange visits abroad. So every year we have a lot of opportunities to visit new countries or improve our foreign languages. Or we can just take part in shorter trips e.g. to enjoy a christmas atmosphere on one of Viennese markets.

# Sport activities

Our school offers a lot of sport free time activities:  
e.g. basketball, volleyball, climbing.

And we have also a dance acrobatic group called **STYX** with very good results and many successes across all the Czech Republic.

Our school organises also some sport courses: rafting, skiing (also in Alps), cycling, courses abroad.

The last four days of the school year there takes place a competition among the classes called „Wallachian games“.

- quite unusual is an annual competition held in December **COPERNICUS' AEROBICS TOUR**
- classes prepare a short dance according to a chosen topic and present it in front of other classes
- at the end one class wins and gets valuable prizes

**Our teachers take part too 😊**

# KOKOS

(means „coconut” in english)

Copernicus' Correspondence Seminar is a mathematical seminary for students of 6th to 9th grades of elementary schools or corresponding grades of grammar schools. It means that the older students from our school prepare a set of problems and send it to younger solvers. Twice a year a math camp is held at our dormitory.

# Unplugged

Musical-dramatic festival organised by students from our school, which connects theater, dance and musical performances into one unforgettable experience. It lasts for 2 days and takes place in our gym.
